

# Web Technologies Lab

**Lab 07****Marks 100****Instructions**

Work on this quiz/lab individually.

You are **NOT** allowed to use internet, mobile phone.

You are **NOT** allowed to borrow anything from your peer student.

Copying/Cheating from any source (e.g., ChatGPT) is **STRICTLY PROHIBITED** and may cause the **CANCELATION/DROP** of your Lab course.

**What you have to do**

Program the following tasks. The name of your files will be according to the task given in this lab.

Take care of code indentation.

**Task****[100]**

Implement a multi-threaded application to read data from multiple files, simultaneously. Create following classes using the specified functionalities.

```
import java.io.*;
public class ReadFile implements Runnable{
    String filename;

    // param constructor
    public ReadFile(String fn)
    {
        fileName = fn;
    }

    // overriding run method
    // this method contains the code for file reading
    // Read and print data line by line with the fileName
    public void run ( )
    {

    }

} // end of class

public class Driver{

    public static void main (String args[])
    {

        // create ReadFile objects by passing file names to them
        // create and start multiple threads (at least two)

    }
```

☺ ☺ ☺ **BEST OF LUCK** ☺ ☺ ☺
